

Marker Collection

Product Description

The Marker Collection from JRB Studio offers a distinctive portfolio of executive furniture that, for the first time, fully integrates sit-to-stand height adjustability with innovative management of power and data. Marker Collection is the next generation of height-adjustability, seamlessly integrating movement, dexterity, access, and performance. It provides executives with a beautifully designed worksetting that is as agile as it is visually articulate.

Features

- integrated storage specifically designed for height adjustability
- optional powered and non-powered mechanisms
- innovative (U.S. patent pending) power and data management system that meets the demands of height adjustability
- fully integrated sit-to-stand height adjustability in a variety of configurations to meet executive space design needs
