

WHEN THE BEST FIT IS RETRO

Are reuse and sustainability your mandate?

JRB Studio offers a unique solution to reuse and sustain your existing tables and desks. First and foremost, our legs and height adjustable mechanisms attach to nearly any surface or shape, allowing you to transform your workspace in a simple, cost effective manner. Because our design is centered on independent table legs and no connecting bars, we provide your team members with superior, unobstructed leg room and maximum storage. Our standard retro fit option includes height adjustability from 22" to 48" with optional height ranges and optional design aesthetics available as needed.

Our innovative approach can help you meet most ergonomic or mobility needs of your diverse workforce. Recognizing that sustainability is not limited to reuse, JRB Studio's electric mechanisms operate at a low, zero point one watt standby power, further enhancing the environmental benefits of our retro fit options. When your mandate is reuse, sustain, and extend the life of your existing workspace, our experienced team can show you how our retrofit options can be the key to your success.
