BAKER
WORK SPACE SOLUTIONS

NEXT™ : ERGONOMIC TABLES THAT ELEVATE THE COMFORT AND PRODUCTIVITY OF OFFICE WORKERS.

NEXT is Baker's most recent advancement in motion control and workspace solutions. No other table provides NEXT's array of benefits, including advanced ergonomics, comprehensive vocabulary, range of applications, refined style, and unprecedented flexibility and affordability.

NEXT tables are available exclusively through Herman Miller dealers and are designed to complement Herman Miller systems, specifically Action Office, Ethospace, My Studio, Resolve, and Vivo.

HEIGHTENED FUNCTIONALITY

- Unique, patent-pending design offers unparalleled versatility
- Legs are independent with no connector bar. Most height-adjustable tables lose 50% of storage capacity due to under surface connecting link between the legs.
- Superior legroom and maximum storage capacity beneath the surface
- Can be attached to any table. Great solution for large and complex surfaces
- Base accommodates existing surfaces, large custom and complex surfaces (up to 8 ft x 8 ft)
- Can be retrofitted to existing systems surfaces with no routing

AESTHETICALLY DESIGNED

- Aesthetics designed by Tom Newhouse
- Artful blend of form and function
- Fresh aesthetic look is light and friendly with refined details
- Light scale and rolling caster foot make tables highly mobile

SURPRISINGLY AFFORDABLE AND MANAGEABLE

- Small scale and uniquely designed base allows small kit of parts for corporate standards
- Ease of installation decreases installation costs as much as 60% compared to traditional height-adjustable tables

ERGONOMICALLY SUPERIOR

- Available in both adjustable and fixed designs
- Available in pin, crank, and electric
- Adjusts from 26" to full 42" height range
- Range of motion addresses heights that are outside of typical range
- Electric actuator is the latest technology and is exclusive to Baker Manufacturing
