

# ANIMATE

*The new standard in maximum sit-to-stand height adjustability.  
An elegant, sculpted table design that blends and energizes the  
workplace of tomorrow.*

## A VARIETY OF MECHANISMS

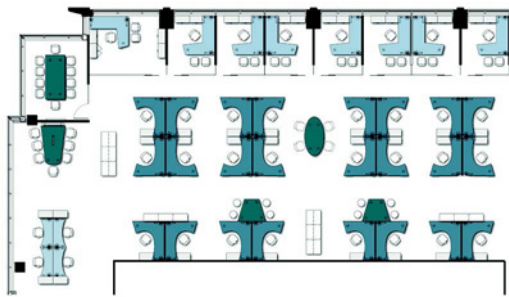

Available in electric mechanism, crank, pin, or fixed height, Animate embraces the latest ANSI HFES maximum range (22"-48"), and offers multiple leg-positioning options.

MECHANISM	ADJUSTIBILITY RANGE
Extended Electric	22" - 48"
Standard Electric	25" - 42"
Crank	22" - 35"
Pin	22" - 35"
Fixed	29"

## CREATE A WORK ENVIRONMENT

The nearly unlimited variety of top shapes and the ability to connect the tables enables Animate to be applied throughout a workplace configuration.

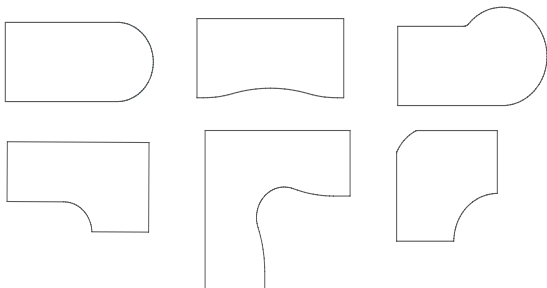

## ROOM TO MOVE

The leg assemblies function fully independently, eliminating the need for a large cross-link that limits knee space beneath the table. The small connector link can connect tables, as shown.

## OPTIONS

Choose from a wide range of standard options — some of which are shown here — or specify nearly unlimited custom shapes, sizes, and material options.

## DESIGN HERITAGE

The Animate portfolio of products was designed by Thomas J. Newhouse, in collaboration with the design and engineering team at JRB Studio. For nearly 40 years, Mr. Newhouse has delivered design excellence in a variety of industries, and has been recognized globally for his work and his contributions to the design profession.

You can also use Animate as a core building block for creating Animate+.
